INDEX

Magos, A.: Synthesis of RC Ladder Networks with Minimum of Capacitances 3

Schnell, L.: Neue Möglichkeiten zur Überwachung der Isolationszustände von elektrischen Hochspannungsmaschinen in Betrieb 15

Gordos, G.: On the Possibility of Unified Description of Modulation Systems 23

Déri, Á.—Fodor, Gy.: Influence of Geometric Parameters on the Corona Loss of 220 and 400 kV Overhead Transmission Lines 43

Habermayer, M.: Stability Test of Linear Control Systems with Dead Time Compensated by PI Controller 53

Hammer, G.: Analysis of the Waveguide Y-Circulator 61

Brandelik, S.: Detail Richness of Pictures Demonstrated by Medical X-ray Pictures 77

Овсянникова, Л. П.—Силади, М.: Квадрупольная линза с плоскими электродами 99

Csáki, F.: A Concise Proof of Sylvester's Theorem 105

Lehoczky, J.: Some Remarks on Absolute Stability 113

Кочиш, Я.: Оптимизация промышленных процессов путем адаптивного программирования 129

Bars, R.: An Automatic Process Identification Method 143

Кочиш, Я., Алмашп, Г.: К вопросу идентификации промышленных овьектов 155

Kovács, T.—Keviczky, L.: ALGOL Procedures for the Evaluation of Quadratic Integral Criterions 165

Csáki, F.—Kovács, T.: Evaluating the Inverse Laplace Transforms from the Pole-Zero Configuration by Digital Computer 173

Habermayer, M.: Stability Test of Linear Control Systems with a Dead Time Compensated by PID Action Controller 181

Horányi, S.—Takács, D.: Investigation of Nonlinear Systems with Stochastic Signals 195

Kárpáti, A.: Die Einwirkung der Ständerwirbelstromverluste auf die Betriebseigenschaften der einphasigen Synchronmaschine mit Dauermagneterregung 205

Кочиш, Я.: Определение оптимальных параметров адаптивного управления 221

Keviczky, L.: The Analysis of First and Second Order Simplex Designs 231

Vágó, I.: Three-Phase Transmission Line Systems with Transposition 243

Vágó, I.: Influence of the Ground Wire on the Electromagnetic Waves Propagating in Transmission Lines 259

Frigyes, A.: Examination of the Closed Control Loops on the Basis of Some Characteristics in the Step Response of the Open Control Loops 269

Magos, A.: Synthesis of RC Ladder Networks with a Minimal Number of Capacitances. II. 277

Füstöss, L.: Applicability of Results of the Monte Carlo Method for the Problems Connected with the Free-Molecule Flow 291

Ambrózy, A.—Gottwald, P.—Székely, V.: Measuring Instruments for Hyperabrupt Varactor Tuning Diodes 301

Zólyomi, I.: Exact and Approximate Solutions of the Storage Time of Diodes with Nonuniform Base Doping 311

Arató, P.: An Upper Bound for the Relative Gap of Threshold Functions 319

KLÁR, J.: Die Prognostizierung in der Industrie und einige ihrer ökonomischen Aspekte 325
VÁGÓ, I: On Theoretical Questions of the Electromagnetic Field of Transmission Lines 337
AMBRÓZY, A.: On the Gate Current of Junction Field Effect Transistors 355
SZURMAY, M.: Einrichtung zur Aufnahme komplexer Übertragungsfunktionen 363
MÁTÉ, L.: On the Connections between Helson Sets and Approximation by Convolutions 373
SELÉNYI, E.: A New Method for Digital Compensation of A.C. Bridges 381
CSÖRGITS, F.: Die Kennlinien der untersynchronen Stromrichterkaskade 399
ZOMBORY, L.: Propagation and Reflection of Electromagnetic Waves in the Presence of Substances with Arbitrary Complex Permittivity 419
SZAKASITS, G.: Selection of mission oriented technical programmes 435
Д. ШИИОН: Об экономическом механизме оптимального планирования 441
